European Bullnose Profile

With our Travertine and Heritage Range some customers have selected one size of paver to use as the header.

Dale Stone Paving Range

Each paver is hand-poured in WA using locally sourced limestone and just enough stone for strength — without compromising the natural cool-underfoot feel. We use hydrophobic pore blockers for added stain resistance and durability. Colours are batch-based and may vary slightly. Please check current lead times before ordering, especially for larger projects.

Please email Julie @dalestone.com.au with any questions or to request a quote.
